HEFAISTOS GLOBAL

ATLAS BEEAMS

FOR PHARMACEUTICAL AND REGULATED FACILITIES

A stronger operating model

ATLAS is a facility management system that connects operating conditions, approved responses and QA evidence.

Energy efficiency

Target avoidable energy use while maintaining required operating conditions.

QA evidence

Ready from the system, with operating context and action history.

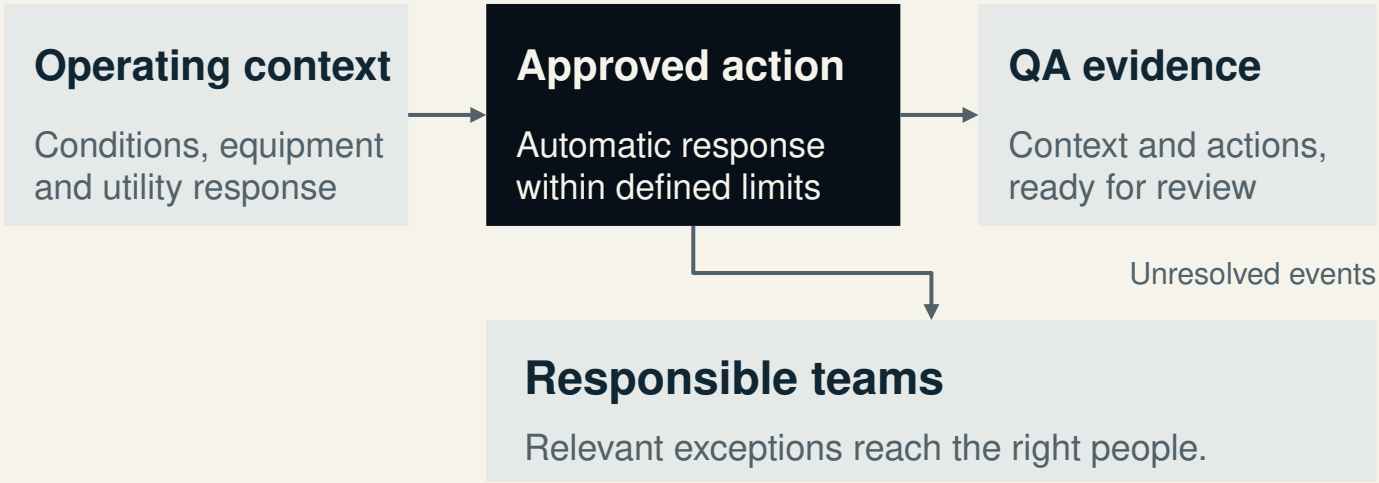

“The familiar controls remain. What changes is the work people must perform between them.”

Evangelos Stamatiou, Compliance Without Waste

HEFAISTOS GLOBAL

ATLAS BEEAMS

A new model for daily operation

Validation knowledge, built into the system

Controlled responses and traceable actions prepare the evidence Quality needs for review.

OPERATIONS Clearer readiness. Less manual coordination.

QUALITY Less time reconstructing events for review.

Expertise you can reach

Built on 25+ years of industrial automation experience.
A standardised core and direct access to senior engineers.

Design and integration through commissioning, validation support and ongoing service.

Siemens Hellas supports our international activities.

ATLAS combines Siemens SIMATIC control and WinCC supervision with Hefaistos's operating model and validation expertise.

Let's discuss your facility.
