HEFAISTOS GLOBAL

EMS / BMS / ENERGY & POWER MANAGEMENT

Before your next facility upgrade

Six questions for Engineering, Quality and Operations.
Use this sheet to agree what needs attention before defining a project.

Facility / system: _____ Date: _____

01 Operating conditions

☐ Clear ☐ To clarify

Which conditions and assets need continuous visibility? Are the required limits and responsibilities documented?

02 Records for review

☐ Clear ☐ To clarify

Can your team retrieve the relevant trends, events and user actions for a chosen period? Which records does Quality need?

03 Energy performance

☐ Clear ☐ To clarify

Do you know where energy is used? Can you compare consumption under comparable production and operating conditions?

04 Existing systems

☐ Clear ☐ To clarify

Which systems must remain in service or connect to the new solution? What data and interfaces are available?

05 Continuity and support

☐ Clear ☐ To clarify

What access restrictions, maintenance windows and support arrangements must the project respect?

06 The first outcome

☐ Clear ☐ To clarify

Which operational problem should be addressed first? How will you recognise an improvement?

Our two priorities

1. _____ 2. _____

Next step / owner: _____

Discuss your priorities with our engineering team.
